DataShield Gov Summit

AI & Quantum Readiness – Delhi Edition

India's Most Important Government-Led Cybersecurity & Data Privacy Forum

15th May 2026 – Delhi

DPDP Act | AI Security | Quantum Readiness

Overview

The DataShield Gov Summit 2026 – Delhi Edition is a high-level, government-focused conference designed to bring together senior policymakers, public sector leaders, regulatory authorities, and technology experts to address India's most pressing challenges in data protection, cybersecurity, and emerging technologies.

At a time when the Digital Personal Data Protection (DPDP) Act is transitioning from policy to execution, the summit serves as a critical platform to enable meaningful dialogue, knowledge exchange, and actionable strategies for implementation across government and industry.

India is entering a new regulatory and security era.

The Digital Personal Data Protection (DPDP) Act is now enforceable

Government bodies and PSUs are increasingly emphasizing compliance requirements.

AI adoption is accelerating without security frameworks in place

Quantum computing is creating future risks for current cryptography

Organizations are no longer asking “What is DPDP?”
They are asking “How do we implement it now?”

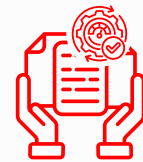

Focus Areas:

The DataShield Gov Summit 2026 – Delhi Edition is designed to bring together policy makers and implementers on a single platform, enabling meaningful, outcome-driven conversations around the real-world execution of the DPDP Act.

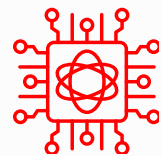

By fostering direct collaboration between government bodies, technology providers, and industry leaders, the event aims to bridge the critical gap between regulation, technology, and deployment ensuring that policies are not just discussed, but effectively translated into scalable, secure, and compliant implementations.

Why Sponsor DataShield Gov Summit?

Strategic Importance

The DataShield Gov Summit 2026 holds significant national importance as it:

- Supports the effective implementation of the DPDP Act
- Strengthens collaboration between policy and execution stakeholders
- Encourages the adoption of secure and compliant digital practices
- Prepares India for emerging threats in AI and quantum technologies
- Contributes to building a resilient and future-ready digital ecosystem

Expected Outcomes

The summit aims to deliver:

- Enhanced clarity on DPDP implementation frameworks
- Stronger partnerships between government and industry
- Increased awareness of AI and quantum-related security risks
- Actionable insights to guide policy and operational decisions
- A foundation for ongoing collaboration and knowledge exchange

Sponsorship packages

Platinum

₹10L / partner

- Speaking opportunity
- Dedicated booth
- 10 delegate passes
- Highest brand visibility
